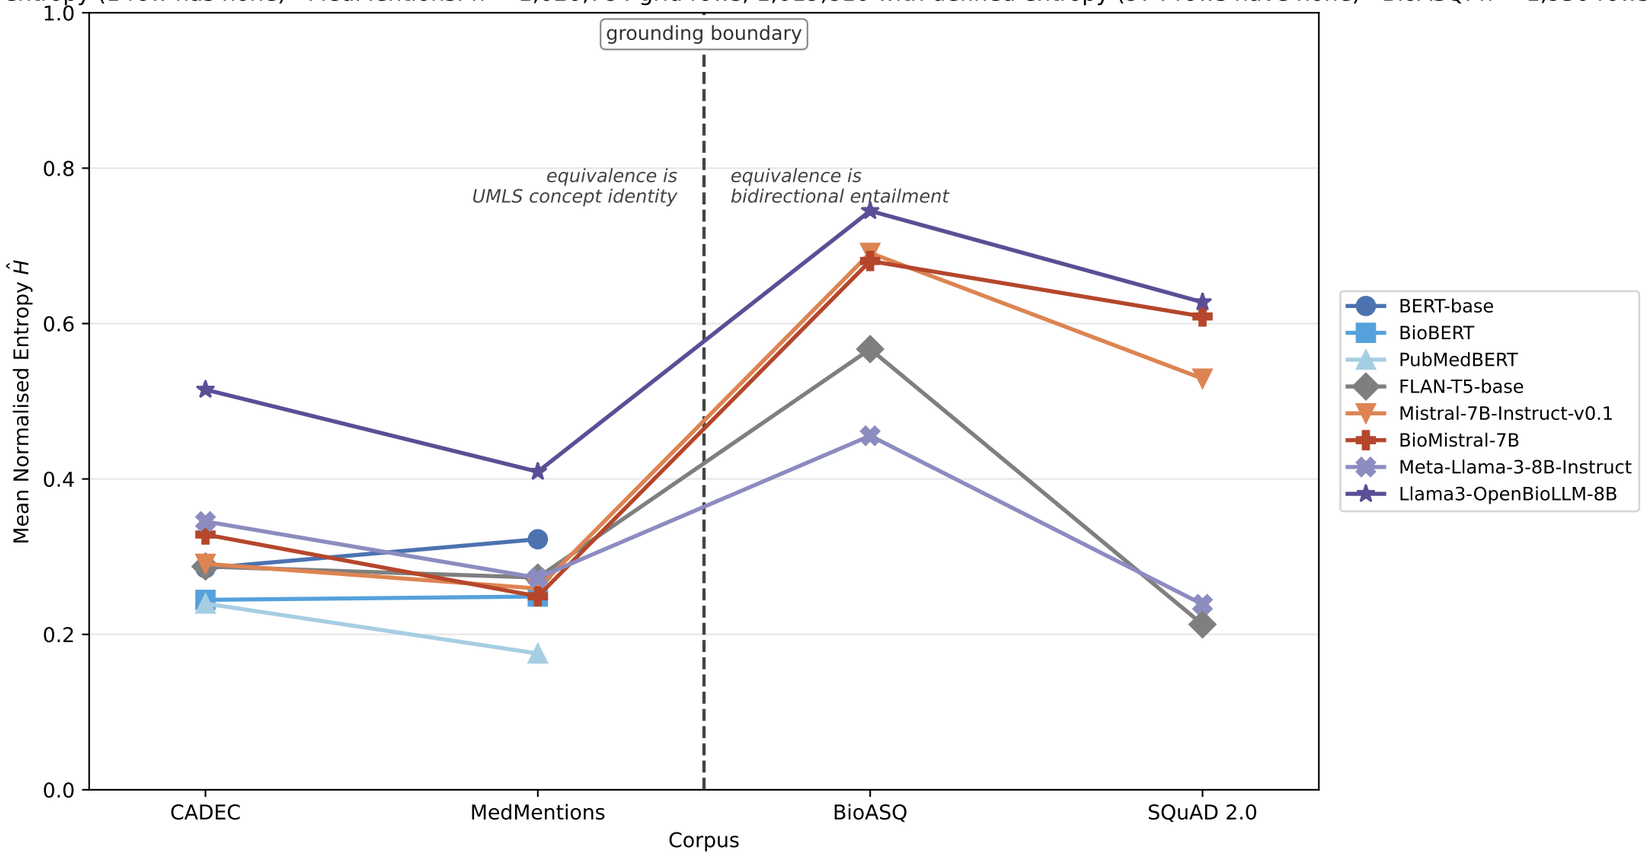
RQ3: mean semantic entropy across the four corpora

Concept lane and question-answering lane measure equivalence differently; the encoders produce no free-text answer and stop at the boundary


CADEC: n = 37,696 grid rows, 37,695 with defined entropy (1 row has none) MedMentions: n = 1,020,784 grid rows, 1,019,810 with defined entropy (974 rows have none) BioASQ: n = 1,950 rows SQuAD 2.0: n = 8,650 rows
